Network Administrator

Adept Network Administrator with a robust background in managing complex network systems and providing exceptional technical support, notably at WW Wood Products, Inc. Demonstrates expertise in network security and disaster recovery, coupled with a keen problem-solving aptitude. Proven track record of enhancing system efficiency and reliability, underpinned by a commitment to customer support excellence.

Core Competencies & Technical Skills

Network Installs, Repairs & Maintenance | System Administration | Data Backups | Server Management
| Firewall management | Virtual Machine Operations | VMware Virtual Environment | Azure Cloud Services
| Azure DevOps | Cisco Call Manager | Cisco Security Suite (Email Security Appliance, Secure Endpoint/AMP, ISE, Redshift) | Cisco/Meraki Switches, Firewalls, Access Points | Microsoft Entra ID Design & Implementation
| Microsoft 365 Suite | Switch Configurations | VoIP Systems | Disaster Recovery | Microsoft Exchange |
Microsoft Configuration Manager | RSAT Tools (Active Directory, DHCP, DNS) | Technical Support | RA & S2S VPN
configuration | SQL Server | Rubrik & Dell DR Solutions | DELL/EMC Storage Arrays

SAMPLE ACHIEVEMENTS

- **Led SQL Server Virtualization Project** – Planned & executed the migration of the company's production SQL database from physical servers to a VMware virtual environment. Built and tested multiple VM scenarios, coordinated network configuration transitions, and achieved a seamless go-live after several months of preparation
- **Implemented Enterprise Backup & Disaster Recovery Solution** – Researched, identified, and deployed a comprehensive backup and disaster recovery strategy covering physical servers, VMware vSphere environments, and SQL databases. Ensured company-wide data resilience and business continuity
- **Designed and Deployed Segmented Network Infrastructure** – Engineered a new network architecture for a facility expansion, creating a dedicated Layer 3 boundary. Configured routing protocols, deployed Layer 2/3 switches, and installed wireless access points, resulting in a secure and scalable environment

PROFESSIONAL EXPERIENCE

Network Administrator | WW Wood Products – Dudley, MO (2018 - Present)

- Configured, monitored, & maintained routers, switches, firewalls, and other networking devices
- Provided technical support to network users & troubleshooted hardware, software, & network connectivity issues
- Set up virtual private networks to securely connect remote users to the corporate intranet
- Coordinated with vendors to resolve technical issues and evaluate solutions for hardware/software purchases
- Implemented security procedures: antivirus protection, firewall configuration, & intrusion prevention systems
- Upgraded firmware on routers, switches, firewalls, and other networking equipment when necessary
- Installed new software applications on the server and configured user access permissions accordingly
- Assisted in developing disaster recovery plans in case of an outage or other emergency situation
- Developed scripts to automate processes for system optimization and maintenance
- Performed data backups and disaster recovery operations

Additional Experience

St Francis Medical Center – Cape Girardeau, MO (2017 – 2018)

Hobby Lobby – Cape Girardeau, MO (2014 - 2018)

EDUCATION

High School Diploma 2009-2013	Puxico High School – Puxico, MO
Completed Coursework: B.S. Computer Engineering 2013–2014	Missouri University of Science and Technology Rolla, MO
Completed Coursework: B.S. Computer Science 2014–2018	Southeast Missouri State University Cape Girardeau, MO
